PLATFORM ENTERPRISE CLOUD (PEC)

Enterprise Cloud Architect Consultants specialising in Microsoft 365 and cloud solutions. The have strong track record of designing and implementing scalable, secure, and efficient cloud environments for small and large organisations. Key responsibilities include leading strategic initiatives for Microsoft 365, developing customised roadmaps for cloud adoption, and implementing governance frameworks to ensure data protection and compliance.

Our consultants also have expertise in Azure services, including identity and access management, cloud migration, and security. Additionally, they possess skills in designing technical solutions on Google Cloud Platform (GCP), with a focus on data engineering, CI/CD flows, and advanced access controls. Their experience extends to managing infrastructure as code, data processing pipelines, and identity management in cloud

PLATFORM INFRASTRUCTURE DELIVERY (PID)

Our expert team offers comprehensive infrastructure consultancy services to help businesses optimise their IT environment. With deep knowledge in HP, Cisco, VMware, and Hyper-V technologies, we tailor solutions that align with your unique requirements. Whether it's upgrading your existing infrastructure, designing new systems, or assessing current performance, we focus on scalability, efficiency, and cost-effectiveness. Our approach ensures your IT infrastructure supports business growth while maintaining robust security and operational reliability.

We specialise in end-to-end infrastructure implementation, leveraging industry-leading technologies from HP, Cisco, VMware, and Hyper-V. Our team manages the full lifecycle of your project, from initial planning to deployment and ongoing support. Whether you're implementing new servers, virtual environments, or network solutions, we ensure seamless integration with your existing systems. By deploying cutting-edge technology and best practices, we deliver high-performance infrastructure that enhances operational agility and maximizes return on investment.

CYBER SECURITY (SEC)

Comprehensive Cybersecurity Wrapper Solutions:
Our cybersecurity services are designed to safeguard your business against evolving threats with a comprehensive approach tailored to industries such as finance, education, and healthcare. Our team of certified Ethical Hackers and expert penetration testers conduct rigorous assessments across your web applications, web services, and mobile devices, identifying vulnerabilities before they can be exploited. We offer in-depth vulnerability assessments, covering both internal and external infrastructure, and provide Cyber Essentials certification support to ensure compliance. Our services include detailed firewall, cloud, O365, build, and code reviews, along with specialized assessments such as phishing simulations, wireless testing, and thick client testing.

We also conduct social engineering exercises, database security reviews, break assessments, and test secure access methods like SSO, SAML, and VPN. With a disciplined, proactive approach, we provide the highest level of security, helping you mitigate risks and fortify your infrastructure against cyberattacks.
